some Dunstblick logo ideas

whatis

Dunstblick:

A graphical user interface with remote display capabilities.
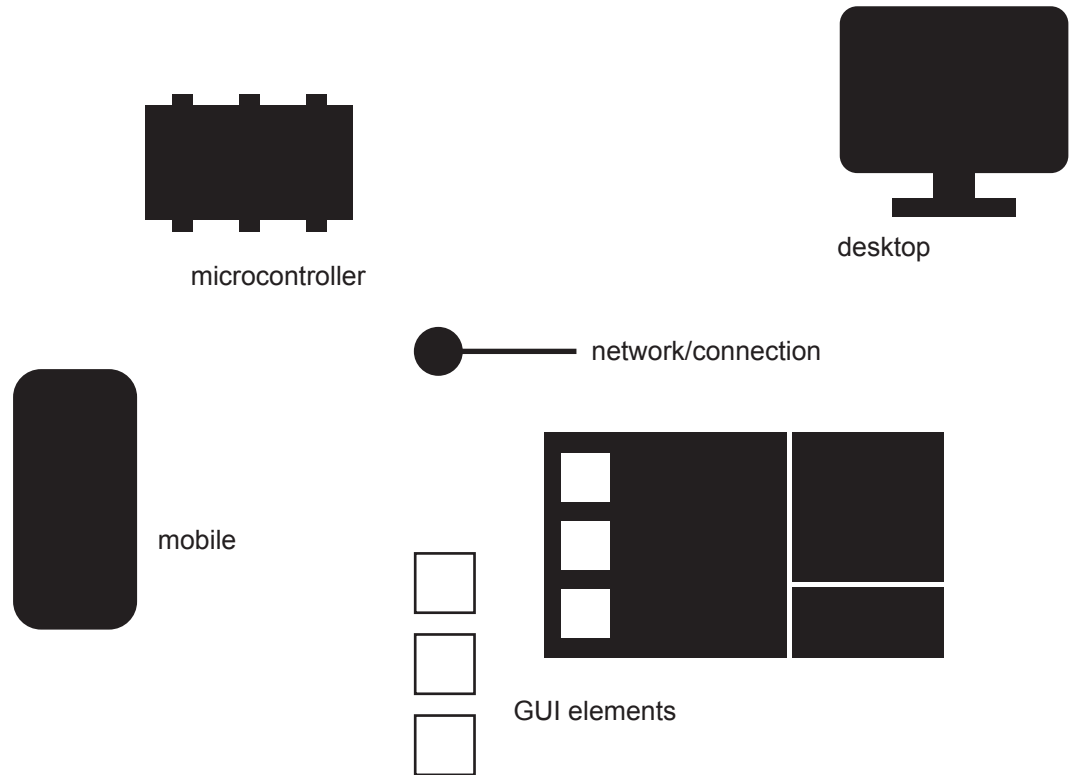

– Simple API
– Declarative approach
– Automatic layouting
– Feasible to implement on a microcontroller
– Low memory footprint
– Reduced graphic fidelity should not hurt the user experience
– Consistent look-and-feel

stating
– GUI
– „All my things"
– network

theme icons

clear, simplified silhouettes, „reduced graphic fidelity", consistency

microcontroller

desktop

network/connection

mobile

GUI elements

font

forgotten futurist

Dunstblick

Dunstblick

color

warm orange

I. simple

few elements
very abstract
recognizable in small scales

Dunstblick

Dunstblick

Dunstblick

II. symbolic

more complexity
network/connective character
„integrated" and „open" as well
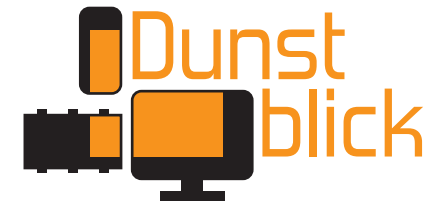

can play with lines for headers
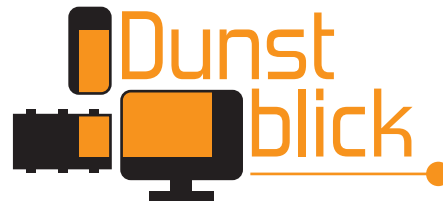

III. gui

central gui
flexible periphery

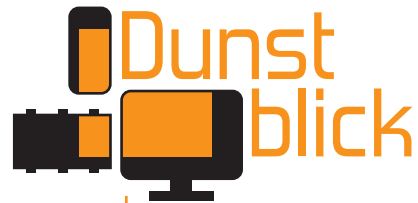

more a self-explanatory diagram

IV. brickwork

saying:
„same gui on/for different peripherals"
looks crafted, brick-like
no exact alignment, except the gui box

playing around with the claim ...

a graphical user interface
with remote display capabilities

banner

a graphical user interface
with remote display capabilities

... speedy

a graphical user interface
with remote display capabilities

V. good ~~look~~ luck

just for fun ;)
